

10 point Lice Management Principles

1. **B**iosecurity. Maintain a stock-proof boundary at all times.
2. **D**OSE accurately to the heaviest animal. Applicator must be calibrated.
3. **A**pply pour-on with a T-Bar within 24 hours of shearing (along midline from ears to tail).
4. **M**ixing treated sheep with untreated sheep must not occur.
5. **S**aturate to skin level for saturation products. Not damp!
6. **4** weeks prior to lambing for treatment to avoid transfer to lambs.
7. **L**abel directions must be read and followed.
8. **I**ntroduced stock should be treated and quarantined.
9. **C**leanly shorn sheep means no tufts, cover combs.
10. **E**very sheep must be treated at the same time.
